SILVER CRANKS MET AT SALT LAKE CITY

THE FREE COINAGE CONVEN-TION HELD THERE.

Delegates From Seventeen Western States Met to Outline a Non-Partisan Movement Toward Bi-metal ism-Gov. Richards Speaks-Congressman Bynum Out For Gold.

Salt Lake City, Utah, May 16 .-Trains Tuesday night and yesterday morning brought in a large number of delegates to the silver convention which convened in the mormon tabernacle yesterday. Delegates are present from seventeen western states and territor-

The policy outlined by prominent members of the convention for its work is to make the movement nonpartisan. The purpose is to encourage men to work in the silver cause without asking them to break party lines. It is to be a unanimous movement for silver independent of politics. It will not be an assault of the west upon the east, but an invitation for the masses of the eastern people to come together on a reasoning basis and to give relief to the west by doing silver justice.

A procession formed at Knutsford hotel, headed by a platoon of police, and drove through the principal streets, reaching the tabernacle about noon. Gov. Rickards called the convention to order. He spoke in part as follows:

"We have met, not to appeal to the prejudices that may cluster instinctively around the self-interest of community or people, not to enter politics, but to institute a movement along new lines for the better education of the masses on the financial problem of the

"Existing conditions, reflecting the evil results of monometallism and the misfortunes of the business world in every phase of our industrial and social life, have stimulated a demand on part of the masses for a better knowledge of financial propositions that self-interests may be respected at the polls.

"The object of this conference is not to devise free coinage arguments, for such arguments are indelibly written upon the progress and prosperity of the human race, but to place in the hands of the voters these arguments in language that men can understand and

"The movement to corner the gold output of the western region that another issue of government bonds may be forced proves one of the dangerous possibilities of monometallism. Differences of opinion as to the value of this policy or that are blended into common cause of self-defense when the treasusy of the United States becomes an object for speculation and the credit of the nation is marked for plunder."

Gov. West delivered an address of welcome, saying that all conditions were favorable to the silver sentiment in Utah. Mayor Baskin welcomed the delegates to the city, Gov. Prince of New Mexico responding.

The Hon. Thomas C. Morrill of Montana, father of the conference, was chosen temporary chairman and the Hon. Henry W. Langnour of California was made secretary. Routine committees were named and the conference took a recess.

CONGRESSMAN BYNUM FOR GOLD.

Defines His Position in a Speech at Indianapolis.

Indianapolis, Ind., May 16.—Congressman Bynum declared for a gold standare last night. He said: "Gold is the standard of measurement of values throughout the world, and whether we maintain it or not as the basis of our financial system our trade and commerce will be carried on and values ascertained and settled by the same inexorable law which fixes the relation of products throughout civilized countries. If all the great commercial nations would enter into an agreement to coin both gold and silver at a ratio approximating their commercial equality the price of silver would, no doubt, be given sufficient stability to hold it up to its coinage value.

"There is, however, but a remote possibility of an international agreement. The question will have to be settled upon a domestic basis. The discussion, therefore, should be directed to the point as to the effect of the adoption of free coinage by our own, regardless of the action of other governments. An immediate contraction of over \$500,000,-000 in the volume of our currency would be the result. This, if no other harm was done, could not be replaced in less than twelve years, the full capacity of our mints being about \$40,000,000 an-

"That we would go to a silver basis at once, silver becoming the sole money of redemption, no one can truthfully gainsay. We would have silver monemetallism and not bimetallism. Our silver money when once divorced from the gold standard would cease to have any fixed value. Before concluding an important transaction it would be necessary for the parties to ascertain the value of the money by which the measurement was to be made, because upon its value would depend the price of the produce. Under such a condition our vast trade and commerce would become so unsettled, prices so fickle and values so fluctuating as to defy all reasonable calculation. Upon the stability of prices and the certainty of profits depend the prosperity and happiness of a commercial people. The purchasing mise between Seiter, the ex-banker of in a factory, every employe upon a rail- about to be effected. The case may be road, every worker in a mine, every amountained. clerk upon a salary-in fact, every per son with a fixed income-would be reduced one-half."

POWELL IS CHOSEN.

Belleville Man Gets the Most G. A. R. Votes at Bloomington.

Bloomington, Ill., May 16.-The sec-

ond day of the twenty-ninth annual state encampment of the Grand Army of the Republic was cold, rain falling nearly all day. The greatest interest held at the Grand Opera house, and the most important business was the election of a department commander. Only accredited delegates were allowed on the floor, and all but members of the Grand Army were excluded, the meeting being conducted in secrecy. A lengthy address was given by Comreviewed the effects of the last year upon the members of the order, death taking a large number of them. The number of members in good standing a year ago was 29,529, and during the year 1,599 dropped out, 530 by death. The candidates for commander were Gen. W. H. Powell of Belleville and Gen. Chicago nominated Powell and Comrade Hamilton of Quincy nominated McNulta. Powell received 453 votes and McNulta 319. The encampment closes to-day, but on account of the severity of the weather but few veterans have remained for the last day.

C. T. Coleman of Canton was elected senior vice-president and E. D. Hubbard of Neoga junior vice-president.

WILL NOT LET MEADE GO.

Secretary of the Navy Revokes the Admiral's Leave of Absence.

Washington, May 16.-The secretary of the navy has issued an order revoking the leave of absence granted to Rear Admiral Meade several days ago. No action has been taken upon the request for retirement, but the action revoking the leave of absence indicates that the request for retirement will not be complied with. The effect will be to place Admiral Meade on waiting ors, subject to any duty, at any time, which the department may desire to assign him. It is believed now that it is hardly likely that any action will be taken to court martial Admiral Meade for his expression of disapproval of the administration, as it is believed to be impossible to obtain testimony from competent witnesses. Civilians cannot be obliged to testify in naval courtsmartial, although their testimony may be taken if voluntarily offered. It is not believed that any direct testimony against Admiral Meade can be so ob-

HORNPIPE THE WINNER.

Usual Coup in the Great Brooklyn

Handicap. New York, May 16 .- Once more the great annual spring horse-race, the Brooklyn handicap, has resulted in a surprise, the winner at Gravesend yesterday being the Messrs. Keene's Hornpipe, a horse that was not considered likely by many people who profess to have a knowledge of thoroughbreds. Hornpipe, who is a 4-year-old stable companion of the mighty Domino, won the race with comparative ease at the end, having a length to spare over Lazzarone, another horse that was figured not to have much chance by the wise ones. The time was 2:1114; distance, mile and a quarter.

Can't Explode the Alleged "Bombs." Portland, Me., May 16.-Much interest is still displayed over the discovery of the mysterious package in the vicinity of the houses of Thomas B. Reed and Mayor Baxter. The fluid found in the bulbs has been subjected to a test by the police, but no explosion followed. Chemists who analyzed the fluid still maintain it is nitro-glycerine. Many people believe the package was placed where it was found by some joker.

POSTPONE DRAINAGE BILL.

Illinois Legislators Want a Week to Think Over It.

Springfield, Il., May 16.-Consideration of the Chicago drainage bill, which was a special order for yesterday in the house, was postponed for one week. Friends of the drainage bill are confident of its ultimate passage notwithstanding this setback. The senate bills to establish northern and eastern Illinoise state normal schools were passed by the house. Fifty thousand dollars is appropriated for each institution. It is expected the school in the northern part of the state will be located at De-Kalb. Mattoon, Paris, Effingham and Olney are the principal competitors for the eastern Illinois normal school. Ingersoll's bill appropriating \$180,000 for each of the next two years for the Illinois national guard was amended so as to provide for the mustering into cervice of a battalion of colored troops and advanced to third reading.

Consideration of the Crawford street railway bills, which was a special order in the senate was postponed until today. JUGGLED WITH THE BOUNDARIES Important Documents Brought to Light By the Venezulian Authorities.

Washington, May 16 .- According to advices received here important British documents have been found at Hawaii regarding the pending British-Venezuela boundary question, in which the United States has urged arbitration as

a means of settlement. Assistant Surveyor-General Curtis J. Lyons of Hawaii has examined them and has made a map, accompanied by a statement which, it is said, supports the Venezuelan contention, even on the evidence thus far presented by the British. Senor Andrade, the Venezuelan minister here, says it is the first time that the documents sent out by the British foreign office have been made available in the controversy. The records now brought to public attention by Mr. Lyons were furnished to Hawaii by the British foreign office at a time when Hawaii was a monarchy and largely under British control. The documents are now on file in the

surveyor's office at Honolulu, where Mr. Lyons has had access to them. He was led to the investigation by the publication last month of an official British map of the territory. On comparing this with the map furnished by the foreign office twenty years ago he found that the boundary line had been entirely changed. The first map gave the line as Venezuela claims it should be. The last map shifts the line far westward and includes as British territory about 10,000 square miles which the first map showed to be clearly Venezuelan territory. This intervening 10,000 square miles is the subject of contention.

The old map was made by the Royal Geographical society of England, and was thereafter given official approval and sent out by the foreign office. It is therefore considered of scientific as well as official value.

According to this decision Walker and Rickard are looked upon as citizens of Great Britain and subject to protection from that country. The decision is particularly interesting on account of the letter recently received from Secretary Gresham, which indicates a policy directly opposed to that of Great Britain. Walker and Rickard are naturalized citizens of Hawaii and took the oath of allegiance. Walker and Rickard have sworn that when they took the oath of allegiance to Hawaii the king told them it would not affect their British citizenship, the British commissioner coinciding with this statement. The dispatch of the earl of Kimberley simply be protected as British subjects. The government would leave this matter to arbitration as a final resort, but will not yield in any other way.

General Assembly of Presbyterian Church Begins Its Session.

Pittsburg, Pa., May 16.-An immense concourse is present at the general assembly of the Presbyterian church. which began here this morning. Speculation on the possible questions that will be brought before the assembly during its session is rife. Some of the delegates already here think that the old question of Briggsism will be revived, while others scout the idea, saying that as it was very effectually squelched once there is no danger of its making an appearance again. Another question that will be up for discussion at some of the first meetings is that of changing the time of calling the assembly together. Some of the churchmen argue that, owing to the expense. the assembly should come together only once every two or three years. This would turn the funds which are yearly contributed for the expenses of the session into the mission work of the church. At present nothing is known about the moderatorship. The general opinion of the delegates is that the west will spring some candidate who will carry off the coveted position.

Sugar is going up and in addition may become a scarce article. The tons short on raw sugar, compared with the 1894 market. The sugar trust, it is understood, is buying liberally with the intention of forcing up prices. This buying of raw, the shortage of the product and the early berry season all over the country are circumstances which it is alleged have combined to make the consumer dig a little deeper into his pockets. In anticipation of advance the retailers the berry season. The southern strawberries are now in the market at prices so low that about everybody may consume them, and this is two or til after the preserving season is over.

Up to the latter part of April the price for granulated sugar in New York was as low as \$4.12 per 100 pounds. Since then there have been seven separate advances of from 6 to 12 cents per 100. > Say That Filth Is Dumped In the River From The Jackson Street Bridge Under Cover of Darkness-Mrs. Sarah V. Bailey Is Dangerously III - Other News Notes.

SPRING BROOK residents have gotten into the habit of carrying their noses in the air. However, that is not because they are stuck up, but it is the result of the odor that comes floating from under the Jackson street bridge. They say that much filth is dumped into the river at that point, and the smell became so able-bodied that the police were appealed to. The residents of that flourishing suburb claim that wagons loaded with filth are driven down from the city in the night and their unwholesome freight is tossed over the railing. During the recent hot spell the stench became almost unbearable, and complaints folwill be a heavy demand for sugar un- lowed. TEMPERING ALUMINUM.

A Recent Discovery That May Greatly Increase Its Usefulness.

The successful tempering of aluminum so as to give it the consistency of iron is the latest triumph of F. Allard, the Levis blacksmith, whose rediscovery of the lost Egyptian art of hardening copper startled the mechanical world some three or four years ago and only failed to make the fortune of its author because of the expensiveness of the process. A recent trial of Allarc's tempered aluminum has proved the success of his new method in Quebec and the pracplied. He has made and hardened a cannon, which has just been tested in presence of Col. Spence, the American con-"I say, Tom, why don't you get sul, with the greatest success. This married? JURY PLAYED CARDS.

Remarkable Discovery Made by a Chicago Judge.

"I have a mind to send you all to jail," said Judge Goggin to the dozen jurors who recently sat during the trial of a damage suit brought by Mrs. Mae McLeroth against the De La Verne Refrigerator company for \$25,000. She was injured in an accident on the ice railway at the World's Fair. The remark of the judge was due to the fact that "No. That happened when he when a bailiff went to the jury room to inquire whether a verdict was possihad something to do with it."-- Iudian ble before adjournment of the court he found the twelve men playing "pedro," and so reported to the court. Judge Goggin sent for the jury, and asked if it was true that the members were playing cards instead of endeavoring to arrive at a verdict. Upon being informed by a juror that it was so, he gave vent to his anger with the above threat. He ordered the men to go back and attend to their duties as jurors, and cease their "high five" deliberations The twelve left the court room in a dejected way, with instructions to seal their verdict.

About Elephants' Tongues.

"Only few of the many people who have thrown peanuts into the elephant's mouths," said Head Keeper Manley of the Zoological gardens to a Philadelphia Record man, "have noticed that the tongue is hung at both ends. A tongue hung in the middle is a human complaint, but elephants have a monopoly on those hung at both ends. The trunk suffices to put the food just where it ought to be, and the tongue simply keeps it moving from side to side over the grinders. When a peanut gets stuck on the elephant's tongue he raises it in the middle, like a moving caterpillar, and the shell cracks against the roof of the mouth, to then disappear down a capacious throat."

THE SOUTH AND FREE SILVER. That the free silver men of the north and west are counting without is concerned, is already apparent.

The business men of the south are thoroughly aroused to the situation, and are organizing to counteract the baneful influence. Brown Bros. & Lincoln. have contributed to this change of sentiment. Until quite recently south error and democrat have been synony. mous terms, but during the past twelve months, conditions have changed.

The success of democracy at the polls and the failure of the party in administering the affairs of government, has been a revelation to an army of southern supporters.

The industries of the south that have been carefully nurtured and successfully developed have been ruthlessly shattered and destroyed. This has meant not only a heavy loss of coln. capital, but a loss of party confidence. As a result, a white republican party strument, step into F. C. Cook & Co's. has sprung into existence in many and hear it play. They also sell southern states, composed of intelli- them. gent men who are in sympathy with republican principles.

By this class of voters, and they are increasing in numbers every day, the free silver craze is recognized as a makesbift to catch votes, and strengthen the failing ranks of democracy. The south is fast learning by experience that the republican party is right in theory and right in practice; many of the southern states will be found in the republican column in

The receipts of the government the first twelve days in May were about \$9,000,000 and expenditures \$14,000-000. For the first ten months of the fiscal year the shortage is close to fifty million dollars. The democratic party is handling the finances.

ELIZA'S WOODEN LEG.

Belle Price Takes It Off During a Fight and Is Fined With Her Friends.

The comic song, "All on Account of Eliza," would have to be elongated to "All on Account of Eliza's Wooden Leg" were it to detail the interesting story of Eliza Mansfield and her little wooden "limb." In a peppery war of words several colored people poured this tale into Justice Foster's ears at the Harrison Street police station to-day, says Chicago Post. Last Sunday morning Eliza Mansfield, whose temper is as violent as her skin is black, quarreled with Belle Price in the yard back of the tenement at 5201 Armour avenue.

"You black hussy, you better hadn't tell me keep my engagement wid de clouds," shouted Eliza in dulcet tones. "You jes' shet yer mouf or you'll want a doctor," was Miss Price's retort dis-This was a challenge to battle, and

neither was loath to fight, so the battle began. Miss Price brought some strategy into play and executed an African coup at the first move. She went at Eliza hard and low; she tackled her and threw her to the ground as easily as a Yale halfback would down a runner. Then she grappled with Eliza and commenced to unfasten her wooden leg. Finally she got it off and threw it into a neighbor's yard. Eliza called for help and then the colored colony in the vicinity engaged in a general fight, which resulted in battered heads, bruised faces and wholesale arrests. Eliza, however, managed to hobble away from the gory scene and escaped without serious injury. Her wooden leg was restored to her and she had the satisfaction of witnessing the discomfiture of her ene-

New rules have been adopted for this tournament, which will do away with the practice, among the crack shots. of missing a bird now and then, in order to win second or third money when several shooters are tied for first money. It is called the Pumphery equitable system and the amount of the purse is to be divided by the number of birds broken by the shooters in the four high places, they to be paid so much per bird for every bird broken. This does away with the "dropping for place." as the man that drops a bird intentionally gets that much less in the purse Otherwise the American Association rules are to govern except that shooters of twelve gauge guns can use one and one fourth ounces of shot. Refreshments and loaded shells can be had on the grounds. All the matches shot will be at fifteen birds, entrance \$1.45, known traps and (unknown angles, and there are eighteen events on the caid for each day.

Monroe officers are quite confident that "Sheeney Red" and "Maxcy" the two men arrested by the Janesville police on suspicion that they knew something about the Albany robbery, are the men wanted. The Monroe Evening Times says there is a strong suspicion that they are the parties wanted and as evidence against them is a little weak an effort will be made Charter Which Would Make Pay- to get all evidence possible. Consequently the case was adjourned when it came up, as the district attorney was confident that further evidence against them could be had by several witnesses who were not present and he thought they could be found before owned by Lawrence Shiveley at the case came up again.

> BOY NEARLY CUT UP BY A TRAIN Close Call For a Serious Accident In The

> Switch Yards. The quick application of the sir brakes on the St. Paul road's Rockford passenger saved a boy's life yesterday. The lad stood on the St. Paul tracks watching the switching on the C. & N. W. line and did not notice that the St. Paul train was bearing down on him. Switchtender John Leshev called to the lad and the engineer blew the whistle, but the boy heard neither. Then the engineer "put on the air" and the train stopped with a jerk. The railroad men say hardly a day passes but one has a close call in the yards as people will persist in walking up and down with-

A SONG OF FATHERLAND.

I've wandered east, I've wandered west, In gypsy wise a random roamer. Of men and maids I've known the best, Like the far traveled king in Homer.

But, oh, for the lan I that bore me! Oh, for the stout old land Of breezy Ben and winding glen And roaring flood and sounding strand

I've stood where stands in pillared pride The shrine of Jove's spear shaking daughter, And humbled Persia stained the tide

Of free Greek seas with heaps of slaughter. I've stood upon the rocky crest Where Jove's proud eagle spreads his pinion

Where looked the god far east, far west, And all he saw was Rome's dominion I've seen the domes of Moscow far, In green and golden glory gleaming.

And stood where sleeps the mighty czar, By Neva's flood so grandly streaming. I've stood on many a famous spot Where blood of heroes flowed like rivers,

Where Deutschland rose at Gravelotte,

And dashed the strength of Gaul to shivers I've fed my eyes by land and sea, With sights of grandeur streaming o'er me But still my heart remains with thee, Dear Scottish land, that stoutly bore me.

Oh, for the land that bore me! Oh, for the stout old land, With mighty Ben and winding glen, Stout Scottish land, my own dear land!

—John Stuart Blackie.

Phosphorescent Light.

Some experiments have been made in France to determine the specific action of a considerable lowering of temperature upon the brilliancy of certain bodies which shine in the dark after having been exposed to sunlight. Tubes of glass filled with the powdered sulphides of calcium, barium, strontium, etc., all substances possessing the property of phosphorescence in a high degree. were exposed to the solar rays and afterward proved to be luminous in the dark, this being done in such a way as to fix upon the memory the mean value of the progressive diminution of the emitted light, and the time also was noted during which the light was strong, less strong and weak respectively. The tubes were next placed in bright sunlight for one minute and then suddenly introduced into a double walled glass cylinder, the interspace of which was filled with nitrous oxide at 140 degrees C. In about five or six minutes the temperature of the tubes was some 100 degrees. They were then withdrawn, and when observed in a perfectly dark chamber no luminosity whatever was perceptible. As the tubes recovered their normal temperature, however, the phosphorescence returned without the exciting agency of the sun's rays or of diffused light. These results were proved to be general for all phosphorescent substances employed. The experiments showed, too, that the production of the phosphorescent light requires a certain movement of the constituent molecules of bodies.

Bearing in mind that, as far as general configuration goes, the ground plans of the present continent have been about the same, only an occasional bit of land having been topped off, as in England.

ALL FAMILIES WANT THE GAZETTE PRIZE

BABY CONTEST IS GETTING VERY SPIRITED.

Five Hundred Dollars Worth of Build. ing and Loan Association Stock Is a Nice Nest Egg For a Three Year Old and the Vote Between Severa Contestants is Very Close.

The time is not far distant now, when some Janesville baby will get The Gazette's \$500 prize. The ballot closes June 1, and then the prize will be awarded. Five hundred dollars is a nice sum for a baby to begin life with. Put it out at interest and when the babe becomes the man or woman, enough cash for a start in life is available.

Do not think that you can sit down and wait for that \$500 to come to your home. The ballots are piling up rapidly, for, naturally enough, \$500 is enough to encourage every father and mother in Janesville to strive for that prize for their "ownest own." Competition is getting strong as the time begins to narrow down and in this case the old adage, "everything comes to he who waits' is from true. It should "everything comes to he who hustles." The Gazette has been asked many times to publish the vote as it stands, but this would not be fair. It would tell Brown that lones was leading him, and The G zette wishes to treat all hands alike. However, the count is close between saveral contestants up to date, and, li : everything else, the "early bird," etc., applies.

The Gazett'es offer is this: The baby receiving the highest number of votes will be presented with

\$500 worth of stock in the Rock County Building, Loan & Savings Association. It will buy an education.

It will buy a buy a building lot. It will buy a piano and the lessons necessary to play upon it.

It is more than many people are able to save in a life time.

Of course all the mothers and fathers want it for their babe. How to the get it is told below:

The polls opened on May lst and will remain open until June 1. The baby that receives the most ballots in that time will receive a certificate calling for these five shares of stock. There are no dues to be paid, no assessments to be met, no installments to provide for. The stock stands for \$500 in cash and on its matur-

which will nine and ore-third the money will be ready. The prize is a hundsome one—it is well worth winning and the conditions of the ballot are as follows:

From March 1 until June 1, a coupon will be printed in each issue of The Gazette.

Any one, anywhere in any state is entitled to vote as often as they buy a copy of The Janesville Gazette containing the above ballot.

Cut the ballot out (trimming on the dotted lines.) Write in the name of your candidate and enclose same in an 10, 1895, inclusive. For tickets and envelope addressed to to Ballot Editor. full information apply to agents Chi-Gazette, Janesville, Wis.

Only one person can be voted for on one ballot.

The baby who receives the largest number of votes will receive five shares of stock in the Rock County Building & Savings Association, cash value, \$500 at maturity.

The contest will close June 1 at 9 p. m., and the stock will be delivered 23, to return May 21th, tickets on as soon as the count of votes is com- sale May 21 to 23. Rate, fare and

A NEW SHUTTLE BOX.

It Has Improved the Facilities for Weaving Our Cotton.

A novel improvement in the shuttle boxes of looms has been made by a London inventor. According to this has no swell or spring, and the shuttle guide, though made somewhat as usual, is mounted at the end nearest to the entrance of the shuttle box on a pin or stud, which acts as a fulcrum; the opposite end of the shuttle guide is free to vibrate, and is formed with a crosspiece, the end of which rests against the back of the shuttle box, or against an adjusting screw or nut, and thus the vibrating end of the shuttle guide is maintained in the required position by means of a blade spring fixed to the front of the shuttle box. The crosspiece, which forms part of the vibrating end of the shuttle guide, is slightly less in length than the width of the ordinary shuttle, and, as the latter enters the box, the vibrating guide acts in lieu of the swell, the blade spring checking the momentum of the shuttle and stopping it. The fulcrum pin of the guide may work in a short longitudinal slot in such guide, and the check strap being attached to the guide, the latter, or the crosspiece of it, will act as a buffer.
